

Wool and Water

The mission of the Adirondack Watershed Institute of Paul Smith's College is to protect clean water, conserve habitat, and support the health and well-being of people in the Adirondacks through science, collaboration, and real-world experiences for students.

Wool and Water is a collaborative project that blends fiber art with scientific information to tell the stories of our waters in the Adirondacks and beyond

“I now know more about milfoil than I ever thought I would.”

“My professor introduced me to your work today. I can’t stop reading, everything is so relevant and urgent. Thanks for being creative with the reality of plastics, among other things. I was really encouraged by the Mirror Lake story and this shows that together we can make a difference.”

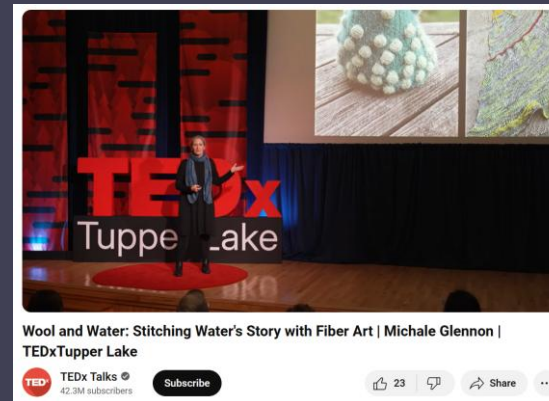

“I would not have understood this if you showed it to me in a graph”
